

Everglades National Park - Florida

The largest subtropical wilderness

in the United States, Everglades National Park protects an unparalleled landscape filled with curious flora and fauna. At nearly 1.5 million acres in size, the park provides important habitat for numerous rare and endangered species like the manatee, American crocodile, and the elusive Florida panther.

Here's everything you need to know to plan a memorable visit to the famed "River of Grass"...

Did You Know?

Everglades National Park preserves one of the largest stands of pine rockland in the world. This globally imperiled ecosystem is also considered one of the most biologically diverse areas in South Florida.
